VANDAL RESISTANT SCREEN
& CHILD-GUARD HALF SCREEN
Tested by ATI for Static Load, Dynamic Load & Missile Impact

SUBSTANTIALLY REDUCES COSTLY SCREEN REPAIRS

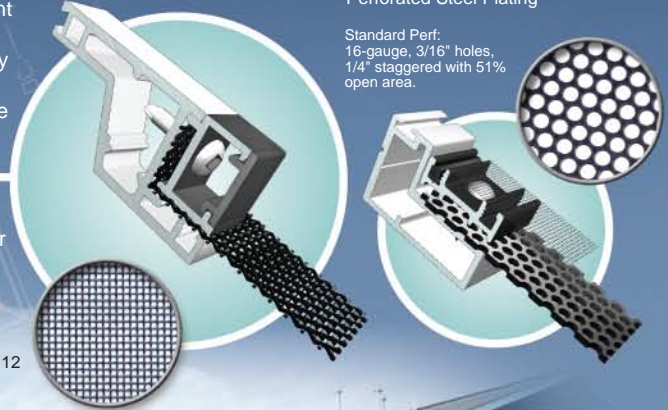

Keystone's Vandal Resistant and Child-Guard Screen products employ heavy duty steel mesh with a 1/2", 90° bend at the edges to ensure tensile strength.

A tie-bar enables two separate pieces of mesh for additional strength. All fasteners are concealed.

Standard Mesh: .023 & .028 12 x 12
(others available)

Also Available: Model 8700 with Perforated Steel Plating

Standard Perf:
16-gauge, 3/16" holes,
1/4" staggered with 51%
open area.

Full Vandal Screen:

- Steel mesh or perforated steel plate
- Extruded two-piece hinge at the head
- Tie bar enables two separate pieces of mesh for additional strength.
- Two pring latches at the sill for positive locking.
- Double hollow aluminum frame
- Installs in existing screen track
- Optional Model 8700 with Perforated Steel Plate

Full Vandal (Center Hinged):

The bottom section of this screen wings up and is held in place with a metal keeper. When the cooling season ends the air conditioner unit is removed and the screen swings back into place to be secured with spring latches.

CHILD-GUARD HALF SCREEN

Every year hundreds of children are seriously injured or killed by accidental freefalls through open windows.

Our Child-Gaurd Half Screen can aid in the reduction of this dangerous situation while allowing airflow for ventilation and maintaining a degree of security.
